Professional Experience

GFT

May 2025 – Present

Front-End Developer

Acting as the primary Frontend focal point in high-critical banking environments, driving technical decisions and ensuring consistent delivery standards across teams.

- Led frontend architecture decisions and the evolution of scalable Design Systems, improving consistency and reusability across applications
- Developed high-performance, responsive interfaces using Angular and TypeScript, ensuring reliability in complex systems
- Integrated REST APIs and backend services, contributing to scalable and secure application flows
- Implemented automated testing strategies (Jest, Cypress), increasing delivery reliability and reducing production issues

Montreal

Nov 2024 – May 2025

Front-End Developer

Contributed to the redesign of a financial system interface using Angular and TypeScript, improving navigation flow and overall user experience.

- Integrated REST APIs and optimized performance in critical application flows, enhancing responsiveness and user efficiency
- Applied web security best practices and participated in code reviews to ensure code quality and reliability
- Collaborated with cross-functional teams in an agile environment to deliver scalable and user-focused solutions

Hyperlocal

Mar 2022 – Nov 2024

Front-End Developer

Developed features for the AvecGo platform using React and TypeScript, contributing to a scalable and maintainable frontend architecture.

- Contributed to the creation and evolution of the company's Design System, building reusable components and ensuring consistency across applications
- Implemented automated testing strategies (Jest, Cypress), increasing delivery reliability and reducing production issues
- Integrated REST APIs and collaborated closely with backend

Education

Jan 2019 – Dec 2022

São Paulo, Brazil

Bachelor's Degree in Computer Science

Universidade Nove de Julho

Certifications & Courses

English Course – EF English (Cursando)

Front-End Development – Origamid (2024)

Scrum Trainer Certification (CST) – CertiProf Certification – ID: 62756068

Technical Skills

Frontend: React, React Native (Expo), Angular, TypeScript, JavaScript, HTML5, CSS3 (Sass)

Architecture: Design Systems, Microfrontends, Scalable Frontend Architecture

Backend & BFF: Node.js, Python (Flask), REST APIs, JWT Authentication

Databases: MongoDB, PostgreSQL

DevOps & Cloud: Docker, Jenkins, Azure DevOps (CI/CD), AWS (EC2, S3), Cloudflare

Testing: Jest, Cypress, Pytest, Vitest

Tools & Practices: Git, GitHub, GitLab, Bitbucket, Webpack, Vite, SOLID, Functional Programming, Scrum

Personal Projects & Open Source

Tweet Analysis Platform

A web application for collecting and analyzing tweets using the Twitter API.

- Backend developed in Python for real-time data collection and processing.
- Frontend built in React, providing interactive visualizations.
- Includes sentiment analysis, Hype Score calculation, and hourly activity metrics.
- Demonstrates full-stack integration and data-driven insights.
